Htmlcoin focuses on providing a strong educational foundation. Our objective is to uncork the latent potential in underprivileged groups of people who are often forgotten and underutilized by the modern world.

We are developing a unique model that our partners truly believe in. The cornerstone of our platform is the underlying belief that all people are created equal, possessing inherent dignity and self-worth in all stages of their life. With this in mind, we are building a digital infrastructure that will become a truly indiscriminating, border less blockchain platform. Through our substantial outreach and engagement efforts, we have allied with a global community actively involved in helping to develop our platform into real-world use-case solutions. These partners are committed to making Htmlcoin their preferred collaboration platform.
